

## W06-P1: Create categories dynamically from data\_61.js

1 / 4

The screenshot shows a web application with a menu titled "Our Menu". The menu has five categories: All, Breakfast, Lunch, Shakes, and Dinner. The "Lunch" category is selected. The menu items displayed are:

- Buttermilk Pancakes** (15.99): I'm baby woke mlkshk wolf bitters live-edge blue bottle, hammock freegan copper mug whatever cold-pressed
- Country Delight** (20.99): Shabby chic keffiyeh neutra snackwave pork belly shoreditch. Prism austin mlkshk truffaut.
- Oreo Dream** (18.99): Portland chicharrones ethical Edison bulb, palo santo craft beer chia heirloom iPhone everyday
- Bacon Overflow** (8.99): carry jianbing normcore freegan, Viral single-origin coffee live-edge, pork belly cloud bread iceland put a bird

The code editor on the left shows the JavaScript logic for displaying the menu items based on the selected category. The code uses a `const categories` array to define the menu categories and a `const displayMenuItems` function to display the menu items based on the selected category. The code also includes a `const filterButtons` array to define the filter buttons and a `const filterButtons` function to display the filter buttons based on the selected category.

=> choose lunch
