w04-p2: P5_61 -- Tours display two fixed data

[illegible]

The image is a composite of three screenshots illustrating a web development scenario.
1. **Left Screenshot (VS Code Editor)**: Shows a file named 'p5_61.js'. A red rectangle highlights a section of code:

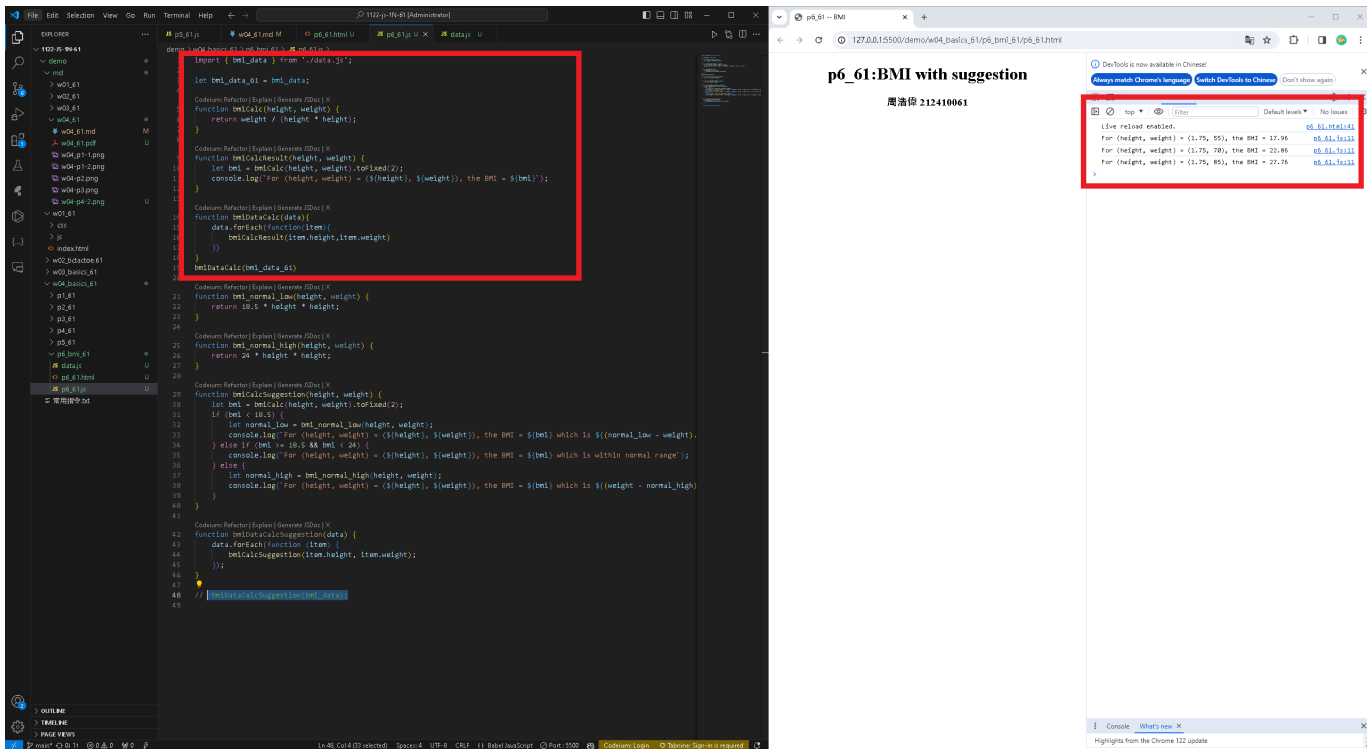

```
const displayTours_01 = () => {
  const tourInfo = tour.map((tour) => {
    const {id, info, local_img, name, price} = tour;
    return `
      <article class="single-tour">
        <div>
          
          <div class="tour-info">
            <h3>${name}</h3>
            <div class="tour-price">${price}</div>
            <div>
              <span>${info}</span><button read more />
            </div>
            <button class="delete-btn">not interested />
          </div>
        </article>
      `;
    });
  }
  section.innerHTML = tourInfo;
}
```

 Below this, a `DOMContentLoaded` event listener is shown:

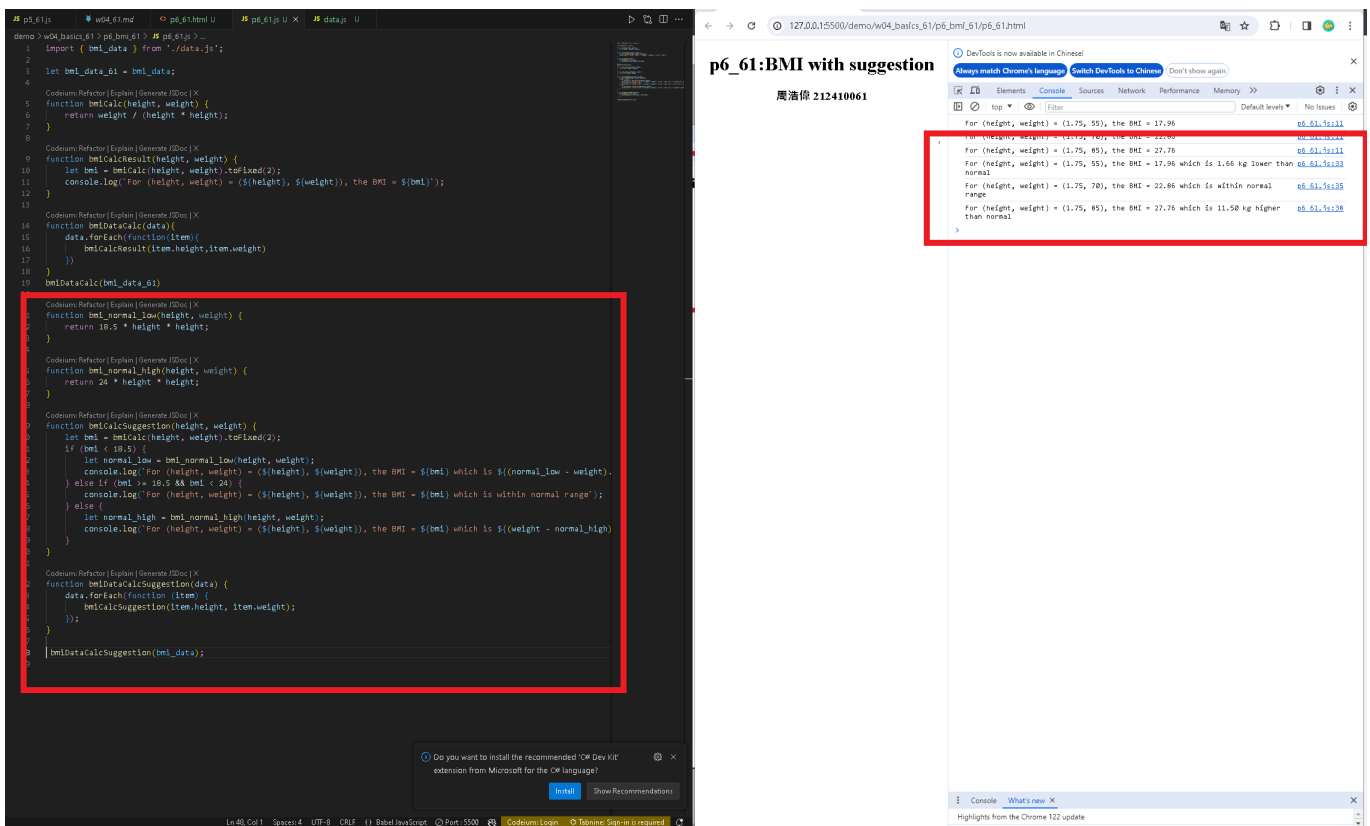

```
$(document).ready(function() {
  displayTours_01();
});
```

2. **Center Screenshot (Web Browser)**: Displays a web page titled 'Our Tours'. It features a card for the 'Best Of Paris in 7 Days Tour' with a background image of the Eiffel Tower at night. The card includes the text: 'Paris is synonymous with the finest things that culture can offer — in art, fashion, food, literature and ideas. On this tour, your Paris-savvy Rick Steves guide will immerse you in the very best of... [Read More](#)'. At the bottom of the card is a 'Not Interested' button.
3. **Right Screenshot (Developer Console)**: Shows the browser's developer console with an error message: 'Uncaught ReferenceError: local_img is not defined'. The stack trace indicates the error occurred in 'p5_61.js:10:10'. The error message also notes: 'local_img is a property of the prototype chain of Object'.
